

Müller IBC Space-Saving Containers

Intermediate Bulk Container made with High-Quality stainless steel finish

If you are looking for a more efficient container for bulk quantities of liquid and granulated substances, take advantage of Müller's intermediate bulk containers (IBC). IBCs decrease costs through reduced handling, storage space and shipping expenses. IBCs are easy to use and transport — plus they can be recycled.

Müller IBC are made with high-quality surface treatments that are electropolished, bath pickled, and have externally invisible weld seams. Production processes includes comprehensive documentation: dimension reports / dye penetrant testing / surface measurement report / pickling and passivation report.

FILLING

- Clamping ring lid DN 400 to DN 600

DISCHARGE

- Pharmaceutical butterfly valve type MCLV
- Tablet valve MCTV
- Suction funnel in different designs

SURFACES

- DIN 17440 2B pickled and passivated
- Optional: externally invisible weld seams, electropolished

GASKETS

NBR / EPDM / silicone

DESIGN

- GMP / CIP-capable

MATERIALS

- Tank and frame, 1.4301 / 1.4404

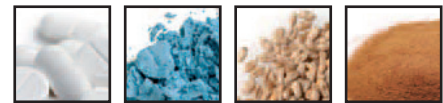

DIMENSIONS

- 600 x 600 mm to 1300 x 1300 mm

VOLUMES

- Nominally from 50 up to 3000 litres

CONTAINER SUITABLE FOR

American International Container | 3 Mars Court, Unit #4 | USA-Boonton, NJ 07005
